

Call for Student Posters

Why submit a poster to the OrthoManufacture conference?

As a student, displaying a poster at the 2-days conference/exhibition Orthomanufacture is a way to gain visibility for your research and your ideas about implants and surgical instruments manufacturing technologies (orthopedics, traumatology, spine and/or dental).

Poster Awards

The digital versions of student posters will be judged for award consideration prior to the conference. Two winners will be rewarded: a first place with 500 CHF and a second place with 250 CHF. Each selected poster will grant a free pass for the student to attend the conferences.

How do I submit a poster proposal?

The electronic file of your poster is to send to contact@orthomanufacture.com

The deadline for submitting proposals is **Friday June, 1**. Student poster proposals are reviewed and selection decisions are made by the Conference Program Committee and communicated by Friday June, 8.
