8TH EUROPEAN CONGRESS ON IMPLANTABLE TECHNOLOGIES

Conferences and exhibition for implants and instruments manufacturing technologies in orthopedics, spine, dental, cardiac and traumatology

15 > 16 MAY 2024

Saline Royale d'Arc-et-Senans
near Besançon (25)

Every year, ORTHOMANUFACTURE offers scientific and technical conferences held by independent speakers.

These presentations will help delegates make choices among therapeutic advances and real technical possibilities with their limits and regulatory obligations. They will also provide additional knowledge and recent information on technologies related to the production of implants and instruments.

The event offers conferences and an exhibition for industries of the sector of implants and instruments in orthopaedics, traumatology, spine, dental. Foundry, forging, additive manufacturing, machining, surface coatings, finishing, packaging but also materials suppliers, companies in control, testing, laboratories, surface characterisation, and more.

Over the 2 days, 200 to 250 visitors and listeners will come to visit their suppliers and discover new ones. Company directors, R&D engineers, project managers, production managers, buyers, sales representatives, quality control specialist and decision-makers will come to look for new contacts and discover innovations relating to the field of implants.

The exhibition offers the possibility of meeting professionals and exchanging knowledge, receiving information on technical, medical and legal advances.

We also offer an entertaining evening program for all attendees, speakers and exhibitors. It's a great opportunity to make more contacts and continue the day's conversations in a more relaxed setting.
