

“Greenway™ 2.0, The way we think, the way we act”

Patrick J. DUCHI

Medical and Micromecanic Markets Manager / Worldwide Senior Cleaning Expert

INVENTEC

ABSTRACT

Since 1874, the Dehon's Group philosophy has been developing innovative and safer technologies for manufacturers, workers and the environment. Inventec Performance Chemicals is the High - Tech branch of this Group, developing over the last thirty years safer and greener alternatives far beyond the European and worldwide regulations. These products and processes are self-rated internally in a system called “Greenway™”. This Greenway™ system includes All parameters as safety, the environment, energy costs, recycling and non-hazardous Chemicals and which is a continuous improvement system. The purpose of this conference is how to further tell markets as the medical-, aircraft-, military- industries, “Greenway™ 2.0, the way we think, the way we act” that such optimized technology brings better results, by at least five to ten times best cleaning process, and by far complying to Norms ISO-19227, ISO-11737-1 and ISO-10993.
