

Curing peri-implantitis? Dream or reality....

MD Dr. João Pedro DOS SANTOS SILVA
Sao Paulo University

Peri-implantitis is a major concern amongst patients.

Who was not suffering about peri-implantitis, the sole illness, disease which no origin was evident causes.

We did suggest new routes for avoiding peri-implantitis.

Deposit+coating with derivative silanes and other ways should promise good perspectives.

Low cost treatment is good for developed countries.

Biologically, it is safe. We need to improve the friction debris.

Objective of the work under co-tutelle Ph.D work between France and Brazil
